

## **Position: User Experience / Interaction Designer**

### **Who We Are**

Nascent is a fast growing start-up consultancy created to build world-class digital experiences. We thrive on taking imaginative ideas and realizing them using the most innovative interface technologies. We are a boutique user experience firm combined with a world-class software consultancy.

We work on the edge of innovation – using the newest technologies to drive amazing user experiences. If you are passionate about interface design and love a challenge, then this is an opportunity to share in the success of a world class team.

By hiring the very best and brightest, and offering an opportunity to grow we strive to build a dynamic environment today and providing incentives for future achievement.

### **The Opportunity**

- Responsible for creating great user interfaces for several platforms and technologies, including: touch / multi-touch screens (WPF), mobile (iPhone / Android / Blackberry), and rich web (Flash / Silverlight / HTML5).
- Create visually stunning user interactions that result in emotionally engaging user experiences.
- Own the design of the most impactful features and participate in the product definition process with the customers and internal teams.
- Collaborate with fellow UX team members to conceptualize, design, and prototype ideas.
- Work with the technology team to realize world-class software experiences.

### **The Responsibilities**

- Design interactive solutions through the use of low fidelity wireframes and flow documents.
- Realize these solutions through the creation of production vector and bitmap graphics.
- Experiment with innovative approaches to visual design that create compelling user interfaces.
- Develop expert-level knowledge of rich interface technologies and bring new ideas on how to better leverage them to the team.
- Work with customer to translate their business goals into software solutions.
- Stay current with new interaction design tools and trends.

### **Knowledge & Skills**

- High degree of creativity, visual design, interaction design, and problem solving ability.
- Fluency with web standards and technologies, including: CSS, HTML, Flash, JavaScript, XAML.
- Experience with Microsoft Expression Blend and/or design for Silverlight and WPF would be an asset.
- Applied experience with information architecture a very big asset.
- Experience with software development processes and life cycles.
- Excellent presentation skills and attention to detail.
- Ability to manage several projects concurrently.
- A strong portfolio of previous graphic work including UI designs that demonstrates a strong understanding of interaction design.
- Expert-level knowledge of key design tools such as Photoshop, Illustrator and experience with Flash.
- Formal education in Visual Design, Interaction Design, Product Design, Industrial Design, HCI, Architecture, or related field would be helpful.

This is a full-time opportunity. Forward resumes to [jobs@nascentdigital.com](mailto:jobs@nascentdigital.com). Please indicate in the email subject line which role you are applying for.

We request that you include samples or portfolios of your recent work.
